

## Accessory - Quick Guide

# SVD

### Product information

Exodraft vibrations dampers are an accessory kit for the Exodraft flange system that reduces vibrations between the chimney fan and the chimney.

The Exodraft flange system has been developed for steel chimneys to ensure that the chimney fan is placed on a flat surface.

The Exodraft flanges are available in various standard sizes that fit most steel chimneys.

Incorrect firing may result in problems with soot, chimney fires, etc. which might damage the product. Please check out this site for advice about lighting and maintaining a fire:

*\*For more details and informations about size and models, see [www.Exodraft.co.uk/product/accessories/flange/](http://www.Exodraft.co.uk/product/accessories/flange/)*

### Warning

To minimise the risk of fire, electric shock, personal injury and/or damage to the product please observe the following:

- Please read the manual before you start using the product and only use the product in accordance with the manufacturer's instructions. If in doubt, contact one of our specialized dealers.
- All installations must be carried out by properly qualified personnel and in accordance with national legislation and regulations.
- In order to avoid chimney fires, ensure that the chimney has been swept before mounting the fan.
- Prior to servicing the product, disconnect the power and ensure that it cannot accidentally be reconnected.
- Exodraft always recommends the use of a smoke alarm when a solid fuel fireplace is installed.

### Disposal

Electrical and electronic equipment (EEE) often contain materials, components and substances that may harm the environment or be hazardous to your health. Products (WEEE) marked with the 'crossed-out wheeled bin' symbol should be disposed of separately from other waste at the end of its life. Though legislation may differ from country to country we strongly advise that electrical and electronic waste is separated from other waste and disposed of according to national legislation to protect the environment and personnel that may come into contact with waste.

# Installation

The installation is different for the different chimney fans. Fixate the flange to the chimney fan with the use of the vibration dampers supplied with the flange. See the guides below for each type. For more information, see the FR+SVD (Flange & Vibrations dampers) manual on <https://exodraft-manuals.com/>
