

Accessory - Quick Guide

SMG12

How to connect 230 V AC to the valve connector.

Step	Action	Illustration
1	Remove the center screw.	
2	Connect the yellow/green wire to the connector insert using the PE terminal. Make sure that the notch highlighted below is facing right. Do not connect the neutral and phase wires.	
3	Mount the rectifier board as shown below. Connect the neutral and phase wires to the terminals on the board.
